

Addressing Coverage Gaps for Vitiligo and Alopecia Areata

Derma Care Access Network – Sample Document

This is a placeholder PDF so the reading experience on the website can be reviewed before the real paper is uploaded. Replace it from the site admin: upload the real PDF in Media, then set it as this resource's link.

The Derma Care Access Network sponsors educational initiatives and advocacy programs designed to encourage informed policymaking about the benefits of access to approved therapies and appropriate clinical care.

Step therapy, prior authorization, non-medical switching and co-pay accumulator programs each add friction between a dermatologist's prescription and a patient's treatment. This paper series documents those barriers and the policy reforms the coalition advances at the state and federal level.

DCAN promotes better skin health through advocating for public policies that:

1. Encourage the advancement of dermatological science and innovation
2. Support the education of patients, healthcare providers, and other stakeholders
3. Promote the development of improved means of preventing and treating skin disease
4. Further access to appropriate prevention and treatment options for all patients.
